Kerala,India

PROFILE SUMMARY

Beginner learning Game Developer with hands-on experience using Unreal Engine 5, Blueprints, and C++ to create gameplay systems and interactive environments. Familiar with character movement, animation systems, materials, landscape design, multiplayer replication, health and damage systems, and gameplay logic. Currently developing practical Unreal Engine projects while strengthening skills in gameplay programming, networking, animation, and level design.

SKILLS

- ❖ **Game Development** :- Unreal Engine 5, Basic Level Design, Animation Blueprints, Lighting, Collision & Triggers, Character Creation
- ❖ **Gameplay Mechanism**:- Character Controls, Timers & Events,Textures,Ui Design, Basic Multiplayer,Health Syestem,Pickup system,
- ❖ **Programming** :- Variables & Data Types, Loops, Classes & Objects, Polymorphism

EXPERIENCE

No professional experience yet — currently building Unreal Engine 5 personal projects and developing practical game-development skills.

PROJECTS

• **Third Person Character**

Created a basic third-person character. Added walking and running. Implemented jumping.Created Idle, Walk, Run and Jump animations. Used Blueprint input and gameplay logic.

• **Landscape & Materials**

Created landscape environments.Used Landscape Paint with multiple materials.Practiced grass, dirt, rock and concrete materials.Experimented with material properties such as color, roughness and metallic.

• **Endless Runner-[In Development](#)**

A simple running game having no ending, simple player movement ,obstacles for player to avoid

• **Security Camera & Door**

Created a security camera using a Static Mesh and Spot Light.Created a security door using Box Collision.Changed the door light from red to green when the player enters. Created a flickering light system.

• **Maze Platformer Level**

Designed a challenging maze/platformer level.Used built-in Unreal Engine meshes.Added platforms, obstacles and different heights.Practiced level layout and environment design.

• **Coin Collection System**

Created a coin collection system using Unreal Engine 5.Added collectible coins that the player can collect by touching them. Implemented collision and overlap events using Blueprint.

EDUCATION & TRAINING

Unreal Engine Game development
EXR Institute
2026
